

# AssumeIT Sensitivity Software for running sensitivities in Excel

AssumeIT Sensitivity Tool for Microsoft Excel provides quick, easy to use sensitivity tools for all your Excel models.

Ideal for performing 'What Ifs' on your spreadsheets and for IFRS 7 Sensitivity Analysis purposes you can choose the type of sensitivity to run, what your inputs are, what your outputs are and run them all at once. The tool was built with the express purpose of keeping it simple. So there are NO questions about co variances, correlations and the like. It is simply there to make your life easier.
